

# Mammoth Roll Packers

## Your Solution(s)

- Compacts heavy duty bulky waste items that conventional compactors just cannot cope with
- Heaviest compaction roller in it's class, due to side mounted design providing maximum reduction in transport and waste handling costs
- Can be used with any standard open container, either in or outside a building, due to low operating height and side mounted design

1750kg drum for maximum compaction

Full safety guarding

Used in standard containers

## The revolutionary waste compaction and recycling system

The Mammoth Roll Packer is exceptionally suited for compacting large amounts of bulky waste into standard open containers. Bulky waste such as pallets, wooden boxes, furniture, drums and other light metal parts will be broken and compacted by the moving roller.

The side mounted design of the Mammoth enables ACM to use the heaviest possible roller for greater compaction. This results in greater container payloads thus reducing transportation costs and site congestion. Furthermore this design allows greater and more uniform compaction throughout the entire length of the container.

## Features/Benefits

- Strong and long lasting structural steel frame and teeth
- Adjustable cycle time
- Flexible heavyweight drum (1750kg)
- Side mounted roller for greater compaction length and reliability
- Compactor or remote mounted controls
- Manual or automatic operation
- Sealed electro/hydraulic operation
- Side or end compaction options

Complete Waste Management

# Crushing your waste disposal costs

The combination of 8 tonnes per square inch of pressure and roller teeth make light work of compacting wood, glass, plastics and even some metal waste products.

The crushing operation takes place safely and securely within the 2.5 meter high steel container thereby eliminating any potential exposure to injury.

Twin headed ACM Mammoth Roll Packer for maximum compaction

Unique 3-dimensional movement design for greater compaction and durability

Space saving end compacting ACM Gigant Roll Packer

## Other core products & services

### Complete Care Programme

Initial audit and full assessment; Top quality machinery and installation; Waste and recycling collections; Excellent after sales and on-going reporting.

### Portable Compactors

100% leakproof waste storage available in a diverse range.

### Static Compactors

An ideal solution for economically disposing large quantities of waste.

### Mill Size Balers

Producing mill sized bales for optimum financial return.

### Single & Multi Chamber Balers

A space saving and efficient recycler for any material.

### Closed End Horizontal Balers

For semi-automatic baling of large quantities of recyclable materials. Systems can be air or conveyor fed for even greater productivity.

## Optional Extras

- ACM Gigant Roll Packer (1350kg drum)
- Additional control panel for remote gantry operation
- For multi-container/segregation of waste, the Mammoth Roll Packer can be supplied in twin roller form (see picture top left)

ACM can provide over 2000 plus different design and size variations as well as one-off bespoke units. For this reason please contact ACM direct for your unique design and site specification.
