

# WasteTrack™

App • Analytics • Client Portal

ACM's WasteTrack™ offers an entirely new way for waste producers to monitor, evaluate, record and control their progress towards zero waste operations. This unique app-based analytics platform is channelled through two leading-edge solutions:

## • The Mobile App:

Available via both iOS and Android systems, this ground-breaking app is remarkably easy to use, allowing you to:

- Book 'on demand' collections and track their progress.
- Change your preferred collection times to suit your business needs.

The ability to control your waste operations is literally at your fingertips!

## • The Desktop Portal (ESP):

Using continuously updated information and ACM's extensive resources, the online Portal will help you to:

- Operate with the highest standards of efficiency, environmental sustainability and industry best practice.
- Produce accurate and sophisticated reporting of all your waste activities

**WasteTrack™ will map and document waste trails and individual waste categories and provide worldwide access to a powerful range of analytics data and app-driven functionality at any time of the day or night!**

# WasteTrack's two unique components

## The Mobile App

Using the Mobile App you can instantly:

- Get up to-the-minute notifications on your waste collections and timings.
- Book an urgent collection on demand.
- Request a quote – if you require a skip for a one-off waste clearance, the App will give you a price so that you can instantly book it.
- Be kept up to date on your waste processing operation while you get on with running your business!
- Check ad hoc billings, invoices and collection schedules.
- View accurate analysis of how every element in your waste stream is processed.

Note: Full functionality of the Mobile App is being introduced throughout 2017/18

WasteTrack™ is yet another market-leading innovation from ACM, helping you to confirm that no single valuable resource from your waste output is wasted.

## The Desktop Portal (ESP)

Discover a wealth of information and resources via ACM's Desktop Portal:

- Monitor single and multi-site operations nationally and worldwide, benchmarking successful operations in line with DEFRA's waste hierarchy.
- Use detailed analytics to produce regular bespoke reports illustrated with pie charts, bar charts and other graphic options.
- Update details on contacts, contracts, waste streams and schedules.
- Examine end-of-use data on how your waste is being recycled and reused.
- Produce multiple copies of compliance documents, including waste carrier's licences, consignment notes, waste transfer notes and insurance details.
- See who in your business has been logged in to the portal and for how long.
- Inspect the service history of ACM equipment supplied to your business.
- Print waste specific posters for all of your internal and external bins.
- Review updates on relevant government regulations and other industry news.
- Carbon Calculator measures your carbon footprint in tonnes of CO<sub>2</sub> and presents carbon savings achieved over time.
